

Informed Consent for Intravenous (IV) Therapy performed at Agape Wellness Clinic

Products and Services

We are providing IV infusions and injections. Vitamins and minerals are essential for the cells to function properly. Vitamin boosts and infusions are the fastest, most efficient way for your body to receive hydration and micronutrients. These essential nutrients are delivered into the bloodstream where your cells can begin to uptake what your body needs right away.

This document is intended to serve as confirmation of informed consent for IV therapy and boost

(Initials)_____ I have informed the provider of any known allergies to drugs or other substances that may be included in the ingredients of my solutions, or of any past reactions to anesthetics.

(Initials)_____ I have informed the provider of all current medications and supplements.

I understand that I have the right to be informed during the procedure, and the risks and benefits. Except in emergencies, procedures are not performed until I have had an opportunity to receive such information and to give my informed consent.

The IV intravenous procedure involves inserting a needle into your vein and infusing over a determined period of time, prescribed nutrients (vitamins, minerals, amino acids).

I understand that risks, benefits and alternatives to IVs may include but are not limited to:

1. The Risks and potential side effects

- Discomfort, bruising, and pain at the site of injection.
- Inflammation of the vein used for injection, phlebitis, metabolic disturbances, and injury.
- Severe reaction, anaphylaxis, cardiac arrest, or death.

2. The Benefits

- Injectables are not affected by stomach or intestinal disease.
- Total amount of infusion enters the bloodstream and is available to the tissues.
- Higher doses of nutrients can be given by vein than by mouth without intestinal irritation that can accompany doses given orally.

3. **Alternatives** to intravenous **vitamin therapy** are oral supplementation and/or dietary and lifestyle changes.
